Submission of Manuscripts

Molecular Cancer Therapeutics publishes studies that address the relationships between molecular structures, biological activities, and the mechanisms of action of pharmacological agents in the general area of cancer. The journal embraces the emerging disciplines - referred to variously as cancer genomics, pharmacogenetics, or pharmacogenomics - in which modern genome technologies are applied to the study of cancer. The Editors will consider manuscripts in the following broad subject areas:

- Experimental Cancer Therapeutics
- Identification of Molecular Targets
- Targets for Chemoprevention
- New Models
- Cancer Chemistry and Drug Discovery
- Molecular and Cellular Pharmacology
- Molecular Classification of Tumors
- Bioinformatics and Computational Molecular Biology

All submissions undergo peer review and should be sent directly to the AACR office for review.
